SIS NOTICES

A System Impact Study (SIS) for National Grid's Knickerbocker to Pleasant Valley 345 kV line project (Queue #384) was completed in July 2013. That Project has been modified by the Applicant with minor modifications to the 115 kV system in the area of Columbia and Dutchess Counties. The Applicant plans to confer with the NYISO to seek a determination whether these minor modifications constitute a material modification from the previously completed SIS. The Applicant has prepared a revised scoping document and is ready to start the NYISO review process shortly after this filing.

By February 27, 2015, the SIS/SRIS studies will be in progress (study scope accepted and work underway pursuant to a Study Agreement with the NYISO).
